REQUEST FOR CONSULTANT STATEMENT OF QUALIFICATIONS
for
REGIONAL WATER SUPPLY PLAN UPDATE**

The Withlacoochee Regional Water Supply Authority (WRWSA or Authority) is requesting “*Statement of Qualifications*” (SOQ) from consultants (Consultant) interested in providing professional engineering services to complete the project known as the “Regional Water Supply Plan (RWSP) Update.” Work will require multidisciplinary expertise in addition to engineering, including hydrogeology, planning, environmental systems, and water quality.

The Authority’s RWSP was last updated in 2014. This work effort will include updated water demand projections, evaluation of source options and potential water supply project options. The update of the WRWSA RWSP will include: updating population projections; existing and future water demands for public supply and other water use categories; traditional and alternative water supply availability; regional groundwater modeling; estimates of the amount of future demands that could be offset through enhanced water conservation efforts; reclaimed water availability and potential offsets; and recommendations regarding the WRWSA Regional Framework.

This project is cooperatively funded by the Southwest Florida Water Management District (SWFWMD). Firms providing professional services for the project must demonstrate compliance with applicable rules, regulations and policies of the Authority and SWFWMD. SWFWMD may review and approve various submittals and work products including but not limited to the contract and consultant pay requests, and project reports for compliance with funding agreements.

Consultant selection will be in accordance with the Competitive Consultants Negotiation Act. Firms desiring to provide these professional services must submit six (6) paper copies and six (6) electronic copies of their SOQ in accordance with the requirements contained in the information packet to the attention of Richard Owen, Executive Director, at the below listed address no later than 2:00 pm local time, January 26, 2018.

WITHLACOOCHEE REGIONAL WATER SUPPLY AUTHORITY

Information Package for REQUEST FOR CONSULTANT STATEMENT OF QUALIFICATIONS for REGIONAL WATER SUPPLY PLAN UPDATE

The Withlacoochee Regional Water Supply Authority (Authority) is requesting 'Statement of Qualifications' (SOQ) from consultants (Consultant) for the purpose of providing professional engineering services to perform and complete the project known as the “Regional Water Supply Plan (RWSP) Update.”

AUTHORITY BACKGROUND

The Authority is an independent special district of the state of Florida, created and existing pursuant to Section 373.713 and 163.01, Florida Statutes. The Authority is comprised of Citrus, Hernando, Marion and Sumter counties and municipalities within this four-county region. The Authority is a multi-county special district of the State of Florida charged with planning for and developing cost efficient, high quality water supplies for its member governments. The Authority is charged with developing, storing and supplying water for county and municipal purposes in such a manner as will give priority to reducing adverse environmental effects of excessive or improper withdrawals from concentrated areas. The Authority works with member governments to develop and implement public supply water conservation programs and will, upon the request of one or more member governments, develop traditional and alternative water supplies to meet growing water needs.

The Authority currently owns the Charles A. Black (CAB) wellfield in Citrus County, with a permitted capacity of approximately 4.6 million gallons per day (mgd) by the Southwest Florida Water Management District (SWFWMD). The system includes seven production wells, two water treatment facilities, two 4-mg and one 1-mg storage tanks and associated transmission system pipelines. The CAB wellfield is operated and maintained by Citrus County pursuant to a water supply agreement.

SCOPE OF SERVICES

A Regional Water Supply Plan (RWSP) is a 20-year assessment of projected water demands and potential sources of water available to meet these demands. The WRWSA and SWFWMD have identified a need to update their RWSPs to incorporate projected public supply water demands through the year 2040, and identify viable water supply development strategies based on available resources, predicted growth patterns, and current regulations facing water suppliers. The WRWSA intends to update and publish its RWSP Update in 2019, which will assist the SWFWMD in developing its 2020 RWSP for its Northern Region. The Authority and SWFWMD are currently in the process of entering into an Inter-Local Agreement to co-fund this project. It is anticipated this cooperative funding agreement will be finalized in early 2018.

The RWSP Update will identify and quantify the public water supply demands and water resources available to meet the demands. The objective is to assist public utilities within the WRWSA region by identifying implementable water supply options and strategies to meet future demands. The timing and feasibility of supply options may vary among the utilities based on their location, level of need, conservation and reuse potential, economic constraints, or the

availability of traditional and alternative water supplies. A comprehensive analysis of options will be completed including permissibility and environmental concerns according to location and potential yield; consideration of utilizing new sources; water quality and treatment requirements; and economic considerations for transmission, pumping, operation and maintenance costs. This analysis should include evaluation of regional, multi-jurisdictional water supply project options that could be undertaken by the WRWSA in cooperation with member governments and local utilities within the region.

The WRWSA will acquire consulting services to undertake the project. This will include coordination of meetings with the WRWSA's Technical Review Committee (TRC) comprised of local governments. The RWSP Update will include estimates of current and future population and water demands for utilities in the WRWSA region based on SWFWMD and St. Johns River Water Management District (SJRWMD) demographic and water use estimates data and other current studies. The update will analyze the potential water use offsets from conservation and reuse strategies for each utility and identify how the strategies can reduce estimated demands. The consultant will review existing publications on water resources and identify utilities with projected demand deficits in the report. The update will identify feasible water supply project options including the appropriate technical, economic, regulatory and environmental characteristics. The update will contain a matrix of viable water supply options, will develop criteria for ranking project options, and will rank projects by priority utilizing these criteria. The highest ranked alternatives will be further defined in terms of project participants, implementation strategy, action items and a proposed schedule. The report will also define governance, cost-sharing and participant structure for those projects that involve multiple entities.

It is anticipated the public supply potential future conservation savings will be developed using the Alliance for Water Efficiency Water (AWE) Conservation Tracking Tool, unless a better approach is identified. The selected consultant will need to be a member of the AWE to use the Tool for this project. The update will include a comprehensive review of water supply project options, and will not simply be an update of the options that were identified in the Authority's past plans.

PROJECT OBJECTIVES:

Project objectives include providing updated information on the following:

- A. Population and water demand estimates and projections for utilities in the WRWSA region based on SWFWMD and SJRWMD demographic and water use data, WRWSA member planning, and other current studies. Projections must be in five-year increments, starting with 2020 going through 2040 as a minimum. Estimates for existing population and water demands should be for the year 2015, unless more recent data is available on a consistent basis. It is anticipated the potential public supply future conservation savings will be developed using the Alliance for Water Efficiency Water (AWE) Conservation Tracking Tool, unless a better approach is identified. Estimates and projections for other water use categories must also be developed for the same time periods. It is anticipated the agricultural demand projections utilized for the update will be based upon the most recent projections developed by the Florida Department of Agriculture and Consumer Services.
- B. Conservation and reuse strategies and projects which prolong the availability of existing water supplies of utilities and other use sectors and which maximize potential water use offsets.
- C. An evaluation of the availability of traditional (the upper Floridan aquifer) and alternative water resources to meet the projected public supply demands and other use sectors and the

timeframe for developing these sources after maximizing conservation and reuse.

D. Identification of water supply project options and associated required infrastructure to meet the future public supply water needs within the WRWSA region.

E. Proposed terms of governance, funding sources and mechanisms, cost-sharing and participant structure for projects that involve multiple entities.

The plan will include project definitions, specific actions, facility production quantities, project costs and unit water costs.

PROJECT DESCRIPTION:

The project area includes the four counties of the WRWSA Region, including the portion of Marion County located in the SJRWMD.

The project updates and consolidates information from multiple prior WRWSA planning efforts including: the 2005 Regional Water Supply Plan Update, the 2009 Water Supply Planning Compendium for the Inclusion of Marion County, the 2010 Water Supply Feasibility Analysis, the 2011 Regional Framework Initiative and the 2014 RWSP Update. This project will include new public supply water conservation savings projections and an evaluation of water supply development project options, and will not rely on simply updating projects contained in previous WRWSA plans.

The consultant will conduct a series of meetings throughout the project duration with the TRC to coordinate and communicate with study team members on project activities. The TRC includes staff from Citrus, Hernando, Marion and Sumter counties, the SWFWMD and the SJRWMD, and local municipalities within the project area. The consultant will also conduct project coordination meetings with WRWSA and SWFWMD project managers. Meetings with individual utilities, particularly those for which it is determined that projected demands cannot be met with existing permitted quantities and for which water supply development options are identified, will be a significant component of the project.

The RWSP Update report will include the following sections:

1. An update of the population and associated public supply water demands in 5-year increments through or beyond 2040 for each public and private water supply utility in the WRWSA region that, as of 2015, had a water use permit with an average annual permitted quantity of 100,000 gallons per day or greater, as well as the domestic self-supplied population within each county. The analysis will also examine the water use associated with private irrigation wells for people who are served by public supply utilities for their potable needs. The analysis will include a comparison of the various BEBR population projections and associated water demands with the population and water demand projections of local utilities. This section will also include demand estimates and projections in 5-year increments through or beyond 2040 for the other water use sectors, including agriculture, industrial/commercial (includes power generation), landscape/recreation, mining/dewatering, power generation, and institutional and other uses.
2. A technical evaluation to identify and quantify viable public supply conservation projects and initiatives, reuse availability and offset potential, and additional public water supply sources as needed to meet the future potable and non-potable water needs of public utility systems through the year 2040.
3. An evaluation of the ability of surface water and groundwater resources to meet the projected demands based on a review of published groundwater and surface water assessments

and current regulatory restrictions including Minimum Flows and Levels (MFLs). The project may include additional regional modeling efforts if warranted by significant changes in existing permitted quantities and withdrawals, demand projections, new regulations, or new hydrologic information. Close coordination with the water management districts to determine the extent and nature of groundwater modeling will be necessary. It is anticipated any groundwater modeling will utilize the most current version of the Northern District Model developed jointly by the SWFWMD and SJRWMD.

4. Project feasibility and planning-level cost estimates of viable water supply project options. Cost estimates will include the Capital Cost based on current McGraw Hill construction cost indexes or a similar reputable source; the annual Operation and Maintenance (O&M) cost; and the Total Cost per 1,000 Gallons based on O&M, debt service of Capital Cost at current available interest rates, and annual average production capacity. Capital costs will also be estimated for associated regional and/or sub-regional water transmission infrastructure.

5. A proposal in terms of ownership, governance, funding sources, cost sharing, and participant structure for regionally developed projects.

6. Conclusions and recommendations containing a matrix with timing and prioritization of potential project options and strategies, with further definitions of the high ranked priorities in terms of project participants, implementation strategy, action items and a proposed schedule.

The Project consultant will prepare and submit technical memorandums of project components and the draft RWSP Update for review and comment by the TRC, SWFWMD and WRWSA staff. Final consultant compensation will be subject to acceptance of the final RWSP Update by the WRWSA Board and the SWFWMD project manager. The Project consultant will make regular presentations to the WRWSA Board on project progress.

The Authority shall, within twenty (20) days after receipt of such notification, fairly judge as to whether or not such service in fact increases the services of Consultant beyond the Scope of Services in the Agreement and constitutes Extra Work. If the Authority determines such service does constitute Extra Work, it shall provide extra compensation to Consultant negotiated by the Authority and Consultant based upon the provisions of Section 6 above.
- C. In the event the Project is entirely or partly suspended, delayed, or otherwise hindered by any cause whatsoever, Consultant shall make no claims for additional compensation or damages owing to such suspensions, delays or hindrances. Such suspensions, delays or hindrances may only be compensated for by an extension of time, as the Authority may decide however such extension shall not operate as a waiver of any other rights of the Authority. Upon resumption of the Project, Consultant shall resume its services until the Scope of Services is completed in accordance with the Agreement, and the time for completion of the services, which were suspended, shall be extended for the duration of the suspension.
- D. If, in the opinion of the Authority, the progress of the Project during any period is substantially less than the amount which is necessary to meet the project schedule, the Authority may require Consultant to take whatever action is necessary, in the opinion of the Authority, to put the Project back on schedule. Such action shall not constitute Extra Work unless the delays were caused by circumstances beyond the control of Consultant or its agents, employees or subcontractors.
- E. In the event of claims by others against the Authority in connection with work being conducted under this Agreement, Consultant shall provide to the Authority such technical assistance that the Authority may request. Such assistance shall constitute Extra Work, unless such claims are caused by the failure of Consultant, its agents, employees, or

subcontractors to comply with the terms and conditions of the Agreement or otherwise perform their duties under the Agreement.

- E. All the policies of insurance so required of Consultant, except workers compensation and professional liability, shall be endorsed to include as additional insureds: the Authority, its directors, officers and agents. Such insurance policies shall include or be endorsed to include a cross liability clause so the additional insureds will be treated as if a separate policy were in existence and issued to them. The cross liability clause does not increase the limits of liability or aggregate limits of the policy.
 - F. Deductible and self-insured retention amounts shall be subject to approval by the Authority, which approval shall not be unreasonably withheld. Consultant is responsible for the amount of any deductibles or self-insured retentions.

 - K. Consultant shall, upon request by the Authority, deliver to the Authority a copy of each insurance policy purchased by Consultant.
 - L. All policies, except for workers' compensation and professional liability, shall contain provisions to the effect that in the event of payment of any loss or damage the insurer will have no rights of subrogation against the Authority, its consultants, directors, officers, representatives or agents. Nothing contained in these insurance requirements is to be construed as limiting the liability of Consultant or Consultant's insurance carriers.

- M. The commercial (occurrence form) or comprehensive general liability (occurrence form) insurance shall include contractual liability insurance applicable to all of the Consultant's obligations under the Agreement, including any indemnity or hold harmless provision.
- N. Consultant shall require each of its subcontractors, suppliers and other persons or organizations working for Consultant to procure and maintain, until the completion of that party's work or services, insurance of the types and in the coverage amounts required to be carried by Consultant in the Agreement unless the Authority agrees, in writing, to other types of coverage and/or lower coverage amounts.
