WITHLACOOCHEE WATER AUTHORITY SUPPORTS WATER CONSERVATION

Declaring April 2018 as Water Conservation Month

LECANTO, FL, March 21, 2018 -- Withlacoochee Regional Water Supply Authority's Board of Directors representing Citrus, Hernando, Marion, and Sumter counties adopted Resolution 18-02 declaring April 2018 as "Water Conservation Month." The Authority's intent is to focus the public's attention on the need for and benefits of water conservation, and to highlight the resources available to help the public conserve water. Since 1998, the state of Florida, water management districts, cities, counties and water-related organizations, such as the Florida Section of the American Water Works Association, have declared April as "Water Conservation Month." April is typically the time of year when water demands increase due to generally hot and dry conditions. The Authority urges every consumer and each citizen and business to become more aware of the need to save water, and to take appropriate measures to conserve and protect this vital natural resource by practicing water saving measures. Additional information about the WRWSA may be found on the Authority's website at www.wrwsa.org.
